Summary

Final-year Computer Engineering student focused on **Generative AI, LLM applications, and intelligent automation**. Hands-on experience building **RAG pipelines** using LangChain, embeddings, and vector databases, and integrating the **Gemini API** into AI-powered applications. Experienced in **Python, REST APIs, data validation, and workflow automation**, with project experience in AI-assisted testing, semantic search, and document validation. Familiar with Docker, cloud deployment, Git, and CI/CD workflows.

Technical Skills

- **Programming:** Python, SQL, JavaScript, Git/GitHub, Linux
- **Generative AI & LLMs:** LLM APIs (Google Gemini), Prompt Engineering, RAG, LangChain, Embeddings, Sentence Transformers, Semantic Search, Vector Databases (FAISS, ChromaDB)
- **AI/ML & Data:** Machine Learning, Pandas, NumPy, Scikit-learn, EDA, Feature Engineering, Data Cleaning, Data Validation, Model Testing
- **Backend & Integration:** FastAPI, REST APIs, JSON, Firebase Firestore, API Integration, Streamlit
- **Automation & Deployment:** Docker, Docker Compose, Kubernetes, AWS, GCP, Jenkins, GitHub Actions, CI/CD
- **Tools & Frameworks:** React, Jupyter, TensorFlow, Matplotlib, Power BI
- **Currently Learning:** OpenAI and Anthropic APIs, LangGraph, Tool Calling, Structured Outputs, LLM Evaluation, Reranking, and Guardrails

Projects

QBot - LLM-Driven Test Automation Framework **GitHub** *2026*
- Integrated the **Gemini API** with Playwright and Selenium to generate and execute test scripts from natural-language prompts.
- Built a full-stack application with a **Python backend**, React dashboard, Firebase Firestore for test-result storage, and Docker-based deployment.
- Led a five-member team to **1st place** in the Innovate Maharashtra Gemini & GenAI Hackathon, competing against 100+ teams.

VERIQ - Compliance Automation & Audit Orchestration Platform *Final-Year Project, 2026–27*
- Developing an AI-assisted compliance platform for **document validation, evidence management, and control mapping** to support ISO/IEC 27001 readiness.
- Designing workflows for evidence verification, duplicate detection, audit tracking, and remediation using Next.js, FastAPI, PostgreSQL, and cloud storage.

RAG-Based Healthcare Assistant **GitHub** *2025*
- Developed a **Retrieval-Augmented Generation (RAG)** assistant using LangChain to retrieve relevant information from a curated knowledge base before generating responses.
- Implemented semantic search using text embeddings and vector-based retrieval to improve contextual relevance and help reduce unsupported responses.

Computational Drug Discovery Platform **GitHub** *2025*
- Built an ML pipeline to predict molecule-target binding affinity using Python, Pandas, NumPy, and Scikit-learn, processing and engineering features from **10,000+ molecular records**.
- Automated molecular analysis workflows, reducing manual effort by **60%**, and deployed the application using Streamlit Cloud.

Experience

DevOps Intern - Deboistech IT Solutions *Jun 2026 – Sep 2026*
- Built CI/CD pipelines using Jenkins and GitHub Actions on Linux, and containerized applications with Docker and Kubernetes to reduce environment-related failures.
- Managed AWS infrastructure and applied feature engineering to monitoring data for performance analysis.
- Maintained GitHub repositories and technical documentation to support collaboration and development workflows.

Machine Learning Intern - Edunet Foundation *Jan 2025 - Mar 2025*
- Cleaned, structured, and validated datasets for two ML prototypes, reducing data preparation time by **40%** through reusable, documented workflows.
- Performed data quality checks and collaborated with senior team members to translate business requirements into actionable data tasks.

Leadership & Achievements

- **Core Team, GDG Nashik; Campus Lead, ML Nashik; Co-Organizer, Grafana & Friends Mumbai:** Organized and spoke at 6+ technical events and workshops, reaching 1,000+ students; managed technical documentation and training resources and contributed to open-source initiatives.

Education

B.E. in Computer Engineering - KBT College of Engineering, Nashik (SPPU) *Aug 2023 - Present*
- CGPA: 7.72/10 | Expected Graduation: 2027

Certifications

AI Fundamentals (IBM SkillsBuild), **Google Cloud Computing Foundations** (Google Cloud), **Python for Data Science** (IBM), **Power BI** (Microsoft)
